

Connecting Industry

**Leading Search Engine and Directory
for the Engineering and Manufacturing Industries**

**MEDIA KIT
2010**

ENGNET® is a leading global **Engineering Directory and Search Engine** for the engineering and manufacturing industry.

Expose your company to the thousands of engineering visitors that frequent ENGNET® every month.

- 46,500 brand name products.
- 35,000 product and service listings.
- 18,000 engineering companies.
- Engineering directory and search engine.
- Quick and easy user interface.
- Great major search engine placements.
- Receive accurate enquiries.
- Eliminate irrelevant enquiries.
- Keyword research report.
- **ENGNET®** uses advanced statistics software to accurately measure the performance delivered to you.
- Every month thousands of engineering visitors are actively searching to find products and services through **ENGNET®**. By helping these buyers find your products and/or services easily, your company will receive more accurate enquiries and orders.

BENEFITS

- Targets the global engineering audience.
- Provides an accurate enquiry system.
- Provides a measurable response.
- Creates major search engine placements.
- Ensures quick and easy user interface.

GOALS

- To assist engineers and technical buyers in effectively communicating with suppliers.
- Provide effective marketing for companies within the engineering and manufacturing industries.
- Encompass all engineering related industries and the products and services therein.
- To be the leading global online engineering and manufacturing directory and resource.

SCOPE

We incorporate all engineering industries, related products and services:

- **Products:** From nuts and bolts to suppliers of mining trucks and cranes – everything engineering.
- **Services:** From small consulting engineers to project houses that produce multi-billion dollar facilities.
- **Engineering Disciplines:** Building & Civil, Chemical, Electrical, Electronic, Instrumentation & Control, Mechanical and many more.
- **Industries:** Architectural, Communications, Food & Beverage, Manufacturing, Marine, Materials Handling, Metals, Steel & Metalworking, Mining, Petrochemical, Power Transmission, Rubber & Plastics, Warehousing & Storage, Water Treatment, Pulp & Paper and many more.

STRENGTHS

ENGNET® has some important strengths over competing companies, namely:

- Experienced engineers have developed **ENGNET®**.
- **ENGNET®** developers have extensive internet, programming, engineering and database experience, applying the relevant skills needed to suit the engineering industry.
- Constant feedback from users enables us to develop the needs and requirements of the industry on an on-going basis.
- Strong user base and extensive worldwide coverage.
- Marketing that delivers results and keeps YOU ahead of the market.

AUDIENCE (USERS)

Users that utilise ENGNET® are individuals involved within the Engineering Industry, namely:

- Technical buyers.
- Engineers/technical designers/draughtsmen.
- Companies looking for strategic alliances and international agencies.
- Importers/exporters for the engineering market.
- Engineering companies sourcing raw material suppliers.

ENGNET® helps many companies within the engineering industry to increase sales from buyers looking for their products & services, and we believe that we can help your company too.

ENGNET® specialises in the promotion of companies within the engineering industry. From our experience we have built up a range of proven methods that will take your company to a position to receive relevant enquiries and sales for your products and services.

One of the secrets we have discovered when increasing sales, is that it is infinitely easier to sell to buyers who are actively looking for your products, rather than you approaching them, making the initial contact and then trying to sell to them. We have found various ways to bring buyers to you when they need your products. We do this by utilising various online marketing methods, designed to direct buyers who are actively looking for your products to you.

‘WE WANT TO HELP YOU SELL TO BUYERS, WHO ARE ACTIVELY LOOKING FOR YOUR PRODUCTS’

AdvertisingOptions

Page 5-9 : ENGNET® Bundles

Summary:

- A directory listing that has been developed over the past 12 years to increase sales for companies, by targeting very specific keywords that bring relevant buyers to your company.

Benefits:

- Buyers who are actively looking for your products and services.
- Receive relevant enquiries.
- Proven ROI.

From R140

Page 10 : ENGNET® Product News

Summary:

- Publish your new product news on ENGNET® to our established audience.

Benefits:

- Keeps industrial buyers and engineers informed of your new products.
- Provides new products exposure to the right target market.
- Increases website traffic.

From R150

Page 11 : ENGNET® Banner Ads / Buttons / Skyscrapers

Summary:

- Accurate and targeted advertising for the engineering and manufacturing industry.
- Increase website traffic.

Benefits:

- Builds brand awareness.
- Improve chances of users selecting your products over other listed companies.

From R85

Page 13-14 : ENGNET® Branded Units Converter

Summary:

- Marketing your customers will thank you for. Give your customers something useful to use and your company will be advertised every time they use it.

Benefits:

- Builds brand and product awareness.
- Constantly reminds your customers of your company's products and services, through our company sponsored Units Converter.

“DRIVE MORE BUYERS TO YOUR BUSINESS FROM PEOPLE LOOKING FOR YOUR PRODUCTS AND SERVICES.”

The ENGET® Platinum 155 Bundle is a directory listing that has been developed over the past 12 years to increase sales for companies. By using very specific keywords, we introduce very specific buyers to your company.

With the Platinum 155 Bundle we can present your company to our existing monthly buyers. We have numerous companies who have been advertising with us for over 12 years. Our customers continue to be satisfied with the enquiries that are generated for them by the ENGET® Search Engine.

Our Bundles are also duplicated in the search engines, bringing you additional visitors for targeted key phrases. We have 7 standard options for you to choose from. Please see page 5 and 6 for details.

BASIC FEATURES:

- Profile Page:**
 - 5000 character profile.
 - Company logo.
 - Picture of company products/services.
- Products/Services Page:**
 - List of up to 155 products and services.
 - 5 product images with titles, descriptions and website links.
- Brand Name Page**
 - List of up to 155 brand name products.
 - Same pictures from Products Page.
- Contacts Page:**
 - Full contact details.
 - Multiple website links.
 - Branch Details (full contact info).
 - Key Personnel.

BENEFITS:

- Provides accurate enquiries.
- Sells to people who are actively looking for your products.
- A keyword research report.
- Provides great major search engine placements.
- Proven return on Investment (ROI).
- Gives detailed monthly statistics.
- Eliminates irrelevant enquiries.
- Produces high visibility through pictures and logos.
- Provides multiple website and email links.
- Each listing optimised for great results.

“SELL TO BUYERS WHO ARE ACTIVELY LOOKING FOR PRODUCTS AND SERVICES.”

The **ENGNET**® search results are classified according to certain criteria and algorithms. However, to offer exclusivity to companies wanting to secure a position in the results for specific search terms, we have introduced the **Tier** structure. The **Tier** structure allows you to select certain products that you would like displayed at a certain level. The **Tiers** available to you are dependent on the Bundle selected.

TIER I POSITIONS

- Only one slot is available on a search result page.
- This is the top position and once secured is exclusive for that company.
- Reserved for **Platinum** Bundles only.
- Company Logo.
- Short description.
- Product Image

TIER II POSITIONS

- Only three slots are available on a search result page.
- This secures position 2 to 4 on a search results page and allows for up to 3 companies.
- Reserved for **Platinum** and **Gold** Bundles only.
- Company Logo.
- Short description.

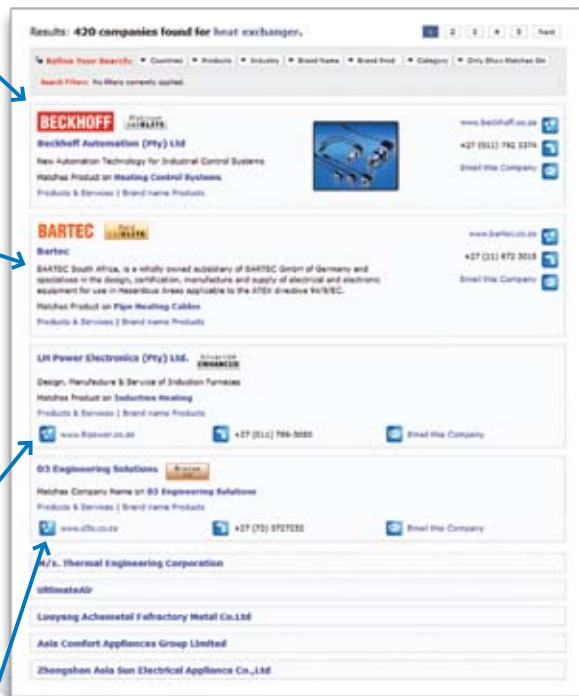

TIER III POSITIONS

- The slots available are unlimited on a search result page.
- This secures position 5 onwards.
- Reserved for **Platinum**, **Gold** and **Silver** Bundles only.
- Short description.

TIER IV POSITIONS

- The slots available are unlimited on a search result page.
- This secures the positions after Tier III's onwards.
- Reserved for **Platinum**, **Gold**, **Silver** & **Bronze** Bundles only.
- Short description.

The quantity and type of Tiers available to a specific bundle is detailed on pages 5 and 6.

“KEEP BUYERS INFORMED OF YOUR NEW PRODUCTS”

Highlight your products: Do you have a new product to launch or have an existing product that you want to promote? Your products can be displayed in our Product News section on **ENGNET**®'s home page and in the Product News section. Our **Gold** and **Platinum** Bundles include product news, alternatively, you can subscribe to a **Product News Bundle**.

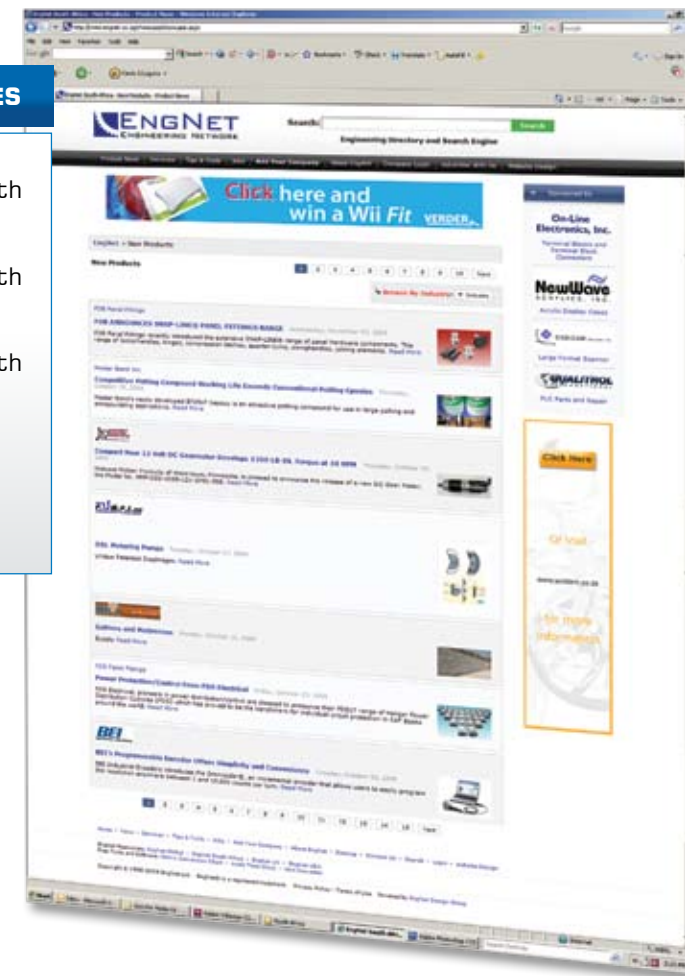

PRODUCT NEWS BUNDLES

- **News10:** R150 excl. VAT per month
- **News20:** R270 excl. VAT per month
- **News30:** R400 excl. VAT per month

* The number indicates the quantity of news items for that bundle

ONLINE SALES MANAGEMENT SYSTEM

S.POD is an easy to use Online Sales Management System. To use the Sales System simply register. This will allow you 30 days use, free of charge, to take it for a test drive. At the end of your trial, you can decide if you would like to sign up.

BENEFITS

The sales system can be accessed anywhere and anytime. Designed for the sales person to easily manage sales and the sales manager to easily manage their sales team.

www.spod.co.za

HOW IT WORKS

Based on the “keep it simple” philosophy, the sales system is designed to be accessed and used without needing any special software, complicated setup or training to use.

COST OF S.POD:

The S.POD costing is based on a monthly cost per User (Sales Person), setup on the system by the Administrator. You are assigned an administrative login on initial registration. This administrative login is used to add or delete users and therefore you control the cost.

- Cost is exclusive of VAT.
- There are no contracts. To stop charges, simply delete users via your administrative login.
- Charges are processed via credit card. Your credit card details will be requested once your 30 day trial has expired and you decide to sign up.

BENEFITS:

- Available anytime and anywhere .
- No software required – only an internet browser.
- No contracts.
- Provides real time data.
- Allows remote operation of sales staff.
- Allows management of remote sales staff.
- Gives you the opportunity to manage the subscription cost.
- Updates made available immediately.
- Allows you to measure your sales staff performance and progress.

R250 per month per user (sales person)

WEBSITE OPTIMISATION

Search Engine Optimisation (SEO) is an effective and economical way to present your company via your website to millions of internet users. ENGNET® has been involved in SEO since it started with the launch of Google in 1998. Our approach has always been 'best practice' giving sustainable and long term results. We keep abreast of all the latest search engine developments and then make sure we apply what will genuinely assist the search engines to correctly and accurately index your website for your products and services. We do not follow fads, gimmicks and tricks, as these gains are short lived and often catastrophic to your website in the long term.

A search engine's job is to return the most relevant result to your search. This is done by indexing billions of internet pages and then through a complex algorithm, matching content as close as possible to your search criteria. The following tips will assist the search engines finding you:

ITEMS NEEDED FOR BETTER SEARCH ENGINE POSITIONS:

- Keywords and Search Phrases (related around your target market).
- Website Structure and Navigation.
- Content.
- Links to your website (inbound links: the more relevant to your business the better. Links is what establishes your page ranking. You can often obtain these from principles, associates, suppliers, online advertising, etc).
- Statistics.
- Website Format.

THINGS TO AVOID:

- New domain names (the age and history of a website has become very important).
- Framed websites.
- Flash only websites.
- Javascript menus.
- Dynamic pages.
- Duplicate content.
- Hidden text.
- Bad links.
- Unreliable or slow website hosting.

* All prices exclude VAT

John Moore, EJ Bowman

BOWMAN

"I'm the systems coordinator for EJ Bowman (Birmingham) Ltd, I assumed the responsibility for the www.ejbowman.co.uk website, but like many engineering companies, EJ Bowman initially took a conservative view of the Internet. ENGNET® contacted our company by email and after initial consultations we have worked together ever since. We use ENGNET®'s online marketing tools and experience; and with the use of the statistical tracking systems provided to us, we have seen an increase in our websites traffic by up to 320%, as well as a huge jump in enquiries received. We now have the ability to track both website visitors and all enquiries that are received, which makes it very easy to prove ROI (return on investment) to top management." John Moore

Mike Imrie, MICAT

"As a small business I could never have imagined the impact an ENGNET® Directory Listing would have on my company. Within the first week of the listing going live, I had a number of significant enquiries, one of which led to a significant export order for Micat, to Mumbai in India. After the first month, I was even more overwhelmed by the continued increasing response and realised I would need to employ another person to help cope with the increasing sales."

Bob Dodson, Cimtec

CIMTEC

"It took about a month to redesign and restructure my website, and within a month of uploading the new website we started seeing excellent results in the search engines. Before uploading the new website, ENGNET® insisted on installing web statistics so we could monitor the effect of the changes he was making. Before his changes we recorded about 2,000 to 3,000 pages viewed in a month, and most traffic was from Pay-Per-Click advertising. After the changes had been implemented in August we recorded 5,355 pages viewed; in September we recorded 10,471 pages and in October it showed 13,393 page viewed. We had seen a four fold increase in just three months, and I was ecstatic. Not only had traffic increased but also my Internet sales had more than doubled after ENGNET®'s specialized knowledge of Internet marketing had transformed my business."

Abby Olsen, Lintec Engineering

"Lintec Engineering had a website for some time before using ENGNET®. When we decided to give it a "face lift" we brought ENGNET® on board to do the website design. The designers understood our market and created a website we are proud of and have caught the attention of many new customers. We also took a full listing with ENGNET®, we now receive relevant enquiries frequently nationally and internationally. Thanks ENGNET® for your great service, good understanding of the "Engineering World" and the nicest staff!"

Warren Mosavel, W.A.C.

"I am sending you this email to congratulate you on an excellent service you guys provide, we have had a truly overwhelming response to our products since we signed up with ENGNET®. We have only been with you for a short period (2 months) and already we have established new recurring customers as well as a whole lot of once off purchases."

Christine Lampret, Atelier S.A.

**ATELIER S.A.**

"Since subscribing to your service we have had unparalleled responses and enquiries regarding the products and services we offer to industry. Not only have we managed to grow our customer base in South Africa but we have also; with the help of ENGNET® and the broader exposure been able to expand our customer base into Africa and have even been surprised to get enquiries from as far a field as Australia, UAE, Saudi Arabia and the United Kingdom."

Mike Jessop, Hydra Marine

HYDRA

"Just wanted to say thank you for doing such an excellent job, never thought it would be this successful."

Conrad Muller, Beckhoff Automation

BECKHOFF

"ENGNET® has delivered relevant sales leads through our companies pages on their site. We are very pleased with their performance, and ability to update new information rapidly."

Hennie de Beer, Aisel Systems

Ek moet sê ENGNET® het ons almalbeïndruk. Ek het vanoggend die log ontvang vanaf ENGNET® en dit lyk nie sleg nie. Die meeste van die navrae wat ons gekry het, is opgevolg en lyk nogal belowend.

YOUR COMMENTS:

"Simple and easy to understand... Very useful site. I use it regularly"
- Barton Firtop Engineering Co Ltd

"Very good category selection"
